Thinking About Choosing a Major?

University Studies (undeclared) students may choose one of eight interest areas to focus their beginning course work. Every Semester, UST academic advisors will help students to: focus on their specific areas of interest, refine their skills and abilities, and stay on track to declare a major which matches their educational goals. All University Studies students should choose a major before the completion of 60 credits. A declared major is necessary in order to graduate with a bachelor's degree.
